

## CONTENTS

Abstract .....	1
1. Introduction .....	2
2. Observation Site and Measurements .....	4
2.1. Snow temperature profiles .....	5
2.2. Width of thermal cracks .....	5
2.3. Snowquake activities .....	6
3. Temperature Variations in the Surface Snow Cover .....	10
4. Characteristics of Thermal Cracks .....	13
4.1. Distribution of thermal crack on the snow surface .....	14
4.2. Variation of the width of thermal crack .....	17
4.3. Thermal cracks and snowquake activities .....	21
5. Characteristics of Snowquake Activities .....	27
5.1. General feature of snowquake activities .....	27
5.2. Relation between strain rate and initiation of snowquakes .....	32
5.3. Amplitude and frequency of snowquakes .....	33
5.4. Epicenter of snowquakes .....	37
6. Relation between Fractures and Snowquakes .....	39
6.1. Viscosity of snow .....	39
6.2. Snowquake initiation and tensile strength of snow .....	41
6.3. Thermal stress by the change of snow temperature .....	42
6.4. Relation between number of snowquakes and release of strain energy ..	44
7. Conclusions .....	46
Acknowledgments .....	47
References .....	47
